

MED01 Safe Harbor Preventative Drug List

This list includes medications identified by MedImpact as those most likely to qualify as “preventive” based on the U.S. Department of Treasury Department/IRS guidance. This list may not include all medications considered preventive or every health condition for which a preventive drug may be prescribed. At this time, neither MedImpact nor your health plan can guarantee which medications will satisfy U.S. Treasury Department definition for preventative safe harbor medications.

In addition, this is a comprehensive list of preventative medications but does not reflect the formulary status of these medications. As such, the following may also apply depending on your plan’s benefit design:

- Utilization management (i.e., prior authorization, step therapy, and quantity limits) may apply to listed medications
- Use of generics may be required
- Some strengths or dosage forms may not be covered
- Certain products or therapeutic categories may not be covered

Regardless of their appearance in this document, please contact member services at the number on your prescription benefits card should you have any questions regarding coverage.

Lastly, please also note:

- Brand and generic status may not be current due to new approvals and drug availability in the market
- This list is subject to change without prior notice
